ABSTRACT

In the fall of 1971, a survey instrument calling for respondents to give basic data about themselves (race, sex, age), to indicate their educational status (class in college), to report their long-range educational plans, and to give other related information was administered to entering students throughout the Florida State University System. A copy of a printout of the survey results for each of the 7 state universities was forwarded to the universities in early 1972. Following the dissemination of the institutional printouts, questionnaire responses for the total number of respondents were analyzed according to sex, race, age, and other factors. This volume contains these analyses. (Author/HS)

PREFACE

In the fall of 1971, a survey instrument calling for respondents to give basic data about themselves (race, sex, age), to indicate their educational status (class in college), to report their long-range educational plans, and to give other related information was administered throughout the State University System to entering students. In some institutions, all or nearly all of the students participated in the survey; in other institutions, a sample of entering students was selected to take part in the survey.

A copy of a print-out of the survey results for each of the seven state universities was forwarded to the universities in early 1972. Following the dissemination of the institutional print-outs, questionnaire responses for the total number of respondents were analyzed according to sex, race, age, and other factors. This volume contains these analyses.

Two companion volumes were prepared, one reporting the survey results and analyses for the public junior colleges, and one reporting similar information for private colleges and universities in Florida.

The results of the fall 1971 survey reported in this volume give a cross-sectional picture of students entering public higher education in Florida in the fall of 1971. In using the volume, one should keep in mind that the total number of students in the survey does not represent the total number of students entering the public universities in the fall of 1971. The number of students in the survey represents a substantial proportion of entering students, however, and therefore the percentage of responses to each item can be taken as indicative of the responses of the total population of students entering the State University System in the fall of 1971.

This volume is the last in the series of published results of the survey sponsored by the Office of the Florida Board of Regents, titled "Characteristics of Entering Freshmen and Transfer Undergraduate Students." This series, begun in 1966, collected data from students entering Florida's colleges and universities during the period of the most rapid expansion in the state's history These volumes mirror the group changes in the students' characteristics and should be useful as basic references for some years to come.

TABLE OF CONTENTS

UNDERGRADUATE QUESTIONNAIRE

Total Population 1
White 13
Black 25
Other Race 33
Male 39
Female 51
Male White 62
Male Black 73
Male Other Race 80
Female White 86
Female Black 97
Female Other Race 104
Age 18 and Under 110
Age 19 121
Age 20 130
Age 21 140
Age 22 148
Age 23-25 155
Age 26-30 163
Age Over 30 170
Selected Because Inexpensive 177
Entered Directly from High School 185
Transferred from a 4-Year School 195
Transferred from a 2-Year School 203
Military Before Entering 212
Worked Before Entering 218
